RETRO-INSPIRED AESTHETICS

Smeg's 50's Style range was born from the contamination between technology and aesthetics, to evoke the unmistakable shapes and atmospheres of timeless style. Pastel shades, bold colours and special editions: Smeg appliances perfectly match the personality of those who choose them, from the most classic to the most eclectic.

ICONIC DETAILS

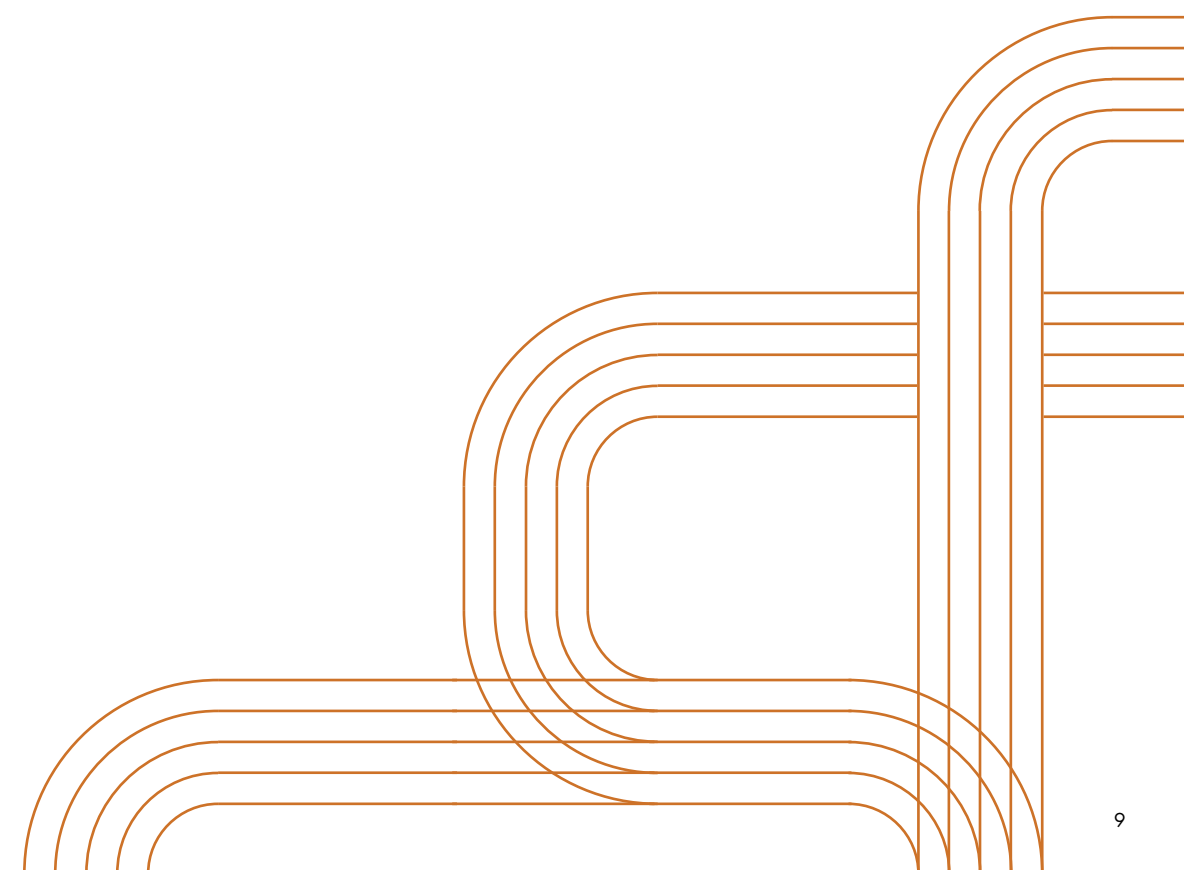

Colours, lines and shapes are reinterpreted in a modern key in products that become the stars of any room. Rounded curves and chrome details harmoniously outline all the products in the collection.

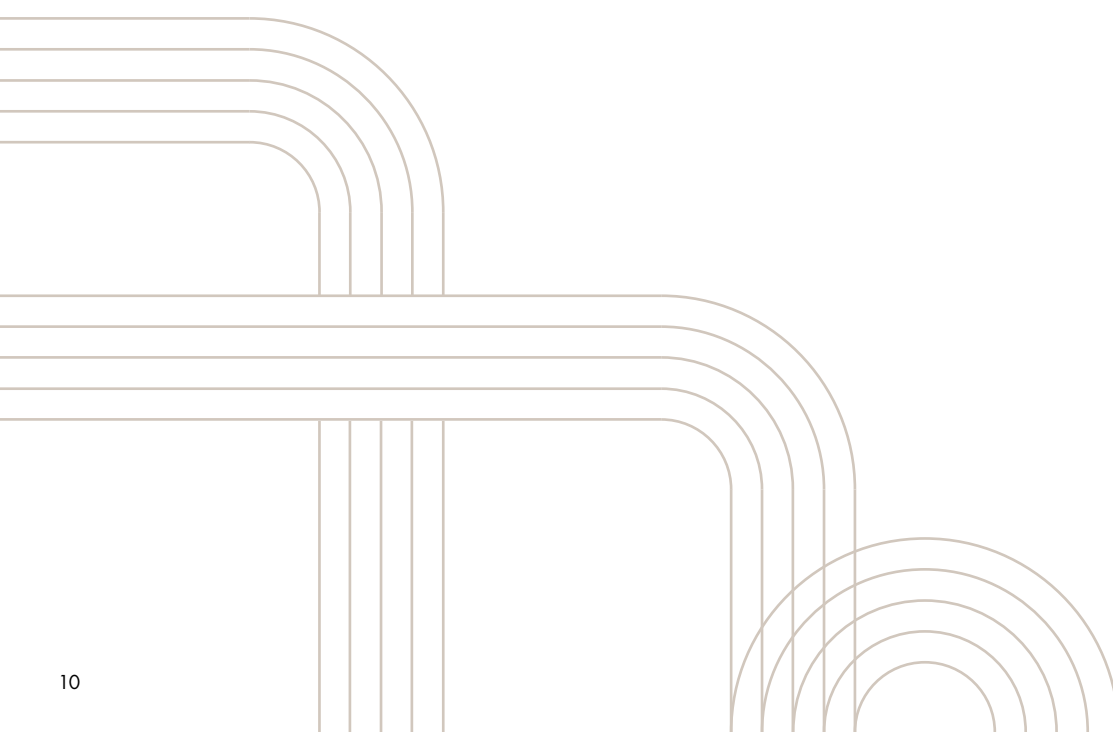

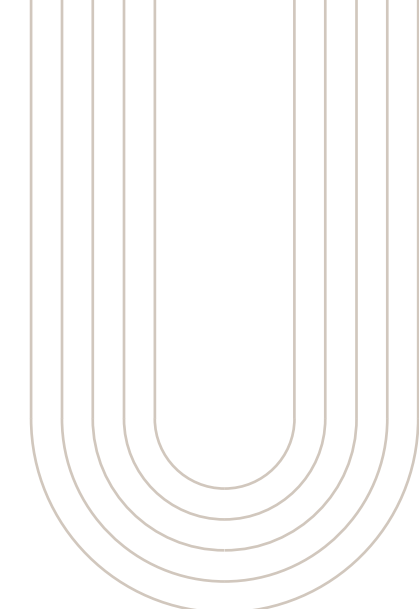

AN EVER-EXPANDING RANGE

The memory of the shapes and lines of the past remains alive in the colourful Smeg refrigerators which have inspired a wide range of perfectly coordinated appliances to add a touch of style to the kitchen and beyond.

TECHNICAL INFORMATION

FAB

LED LIGHTS

LED interior lighting allows perfect multilevel visibility.

ELECTRONIC TEMPERATURE CONTROL

The electronic thermostat optimally manages the temperature reducing fluctuations within the cell.

MULTIFLOW COOLING SYSTEM

It distributes the cold air evenly throughout the refrigerator ensuring ideal temperature and humidity for proper food preservation.

ELEGANT CHROME FINISHING

The profiles of the balconies and glass shelves are designed with brilliant chrome finishes in a retro design.

LIFE PLUS 0°C DRAWER

Thanks to a lower internal temperature than in the rest of the refrigerator, the organoleptic qualities of the food are preserved.

FRUIT AND VEGETABLES DRAWER

Equipped with an adjustable perforated panel, it allows you to customise the degree of ventilation and humidity in the bio compartment.

Characteristics may vary depending on the product.
